

HARDWOOD COMPONENTS

PRODUCT GUIDE V2

WALNUT CREEK PLANING LTD

About our company...

Walnut Creek Planing specializes in products manufactured from hardwoods native to the Eastern United States and beyond.

Logs are cut at local sawmills just days after being harvested.

This green lumber is then brought to our mill and meticulously graded and repackaged into units, then air dried in specially designed sheds for 1 to 12 months depending on species and thickness of material.

The air dried lumber is then brought to our state-of-the-art dry kilns, where it is carefully dried to precise specifications.

After the drying process is complete, the lumber is shipped to our climate controlled manufacturing facility to be milled into a large variety of products.

Hardwood Species 1

Hickory

Ash

Walnut

Red Oak

Sapele

White Oak

Beech

door stiles • mouldings
• handrail

Door Stiles

exterior & interior doors

Furniture Parts

table tops • shaped legs
• turned legs

Sheet Goods

full sheets

• cut to size components

4 Our Standard for Dependability & Quality

Welcome,

It has always been my desire, if the Lord blessed me with a business, that his name would be exalted through it. My desire is that Walnut Creek Planing as a company would show forth God's way of honesty and integrity by being a company that has a caring heart for each other and those they serve. I have always loved the salutation in Ruth 2:4 as Boaz came to his reapers and said "The Lord be with you", and they answered, "The Lord bless thee."

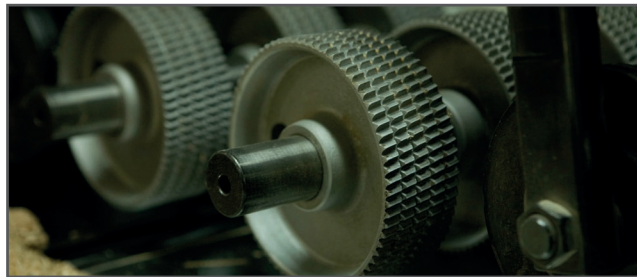

As a company our mission is to treat others as we would like to be treated. This is based on Matthew 7:12 - "So in everything, do to others what you would have them do to you."

As for the future, we look forward to serving you. Our prayer is that our service can help your business thrive!
